

# Medical Genomics course

*N. Alcala & M. Foll*

Computational Cancer Genomics Team

2025

International Agency  
for Research on Cancer

World Health  
Organization

Computational  
Cancer  
Genomics

# Philosophy

## Hands-on course with a focus on real-world medical problems

> to know if you want to dedicate your professional career to medical genomics research, you need to **experience what working on a typical medical genomic project is like**

> We will see just enough theory to grasp the main concepts and then **code and do actual data analysis**, and do **team work**

# General information

**Venue:** IARC – WHO: the world's cancer agency <https://www.iarc.who.int>

**Attendees:** INSA students + CanBioS doctoral school students + IARC early career scientists (normally ~20 students in total)

**INSA** | INSTITUT NATIONAL  
DES SCIENCES  
APPLIQUÉES  
LYON

**CanBioS**  
CANCÉROLOGIE  
BIOLOGIE  
SANTÉ  
UNIVERSITÉ DE LYON

IARC nouveau centre in the Gerland biodistrict

**Nicolas Alcala**  
Computational  
Cancer  
Genomics team,  
cancer ecology  
and evolution  
[alcalan@iarc.who.int](mailto:alcalan@iarc.who.int)

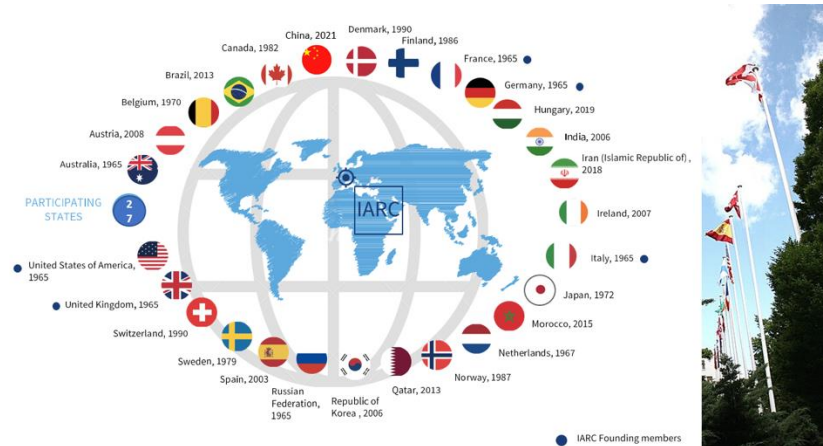

**Matthieu Foll**  
Computational  
Cancers  
Genomics team  
leader, head of  
bioinformatics

International Agency for Research on Cancer

# IARC's Mission: research on cancer prevention

- ♦ .. is the **specialized cancer agency** of the World Health Organization (WHO).
- ♦ .. promotes **international collaboration** in cancer research.
- ♦ .. identifies the **causes of cancer** so that **preventive measures** may be adopted.
- ♦ .. conducts research in **LMICs** through **partnerships and collaborations** with researchers in these regions.

27 Participating States  
+2 who recently joined

# Main areas of IARC's research

Pillar 1 Data  
for action

Cancer  
Surveillance

Pillar 2  
Understanding  
the causes

Nutrition &  
Metabolism

Genomic  
Epidemiology

Laboratory Support  
& Biobanking

Pillar 3 From  
understanding  
to prevention

Early Detection,  
Infections &  
Prevention

Environment &  
Lifestyle

Pillar 4  
Knowledge  
mobilization

Evidence Synthesis  
& Classification

Learning &  
Capacity Building

# The Computational Cancer Genomics team

Multi-omics characterization of tumors. Identify aggressive phenotypes.

> **Cancers of interest:** mesothelioma, neuroendocrine neoplasms (focus on lung), rare cancers (<https://rarecancersgenomics.com>)

> **Approaches:** bioinformatics, computational biology, deep-learning, modeling, evolution and ecosystems

> **Techniques:** genome, transcriptome, epigenome, single-cell and spatial omics, images

Matthieu Foll  
Team leader - Computational Biology

Lynnette Fernandez-Cuesta  
Team leader - Biology/Biochemistry

Nicolas Alcala  
Scientist - Statistics

Laurane Mangé  
PhD student - Computational Biology

Alexandra Sexton-Oates  
Scientist - Biology/Biochemistry

Catherine Voegelé  
Data analyst - Bioinformatics

Lisa Bonheme  
Postdoc - Machine learning/AI

Gabrielle Drevet  
PhD student - Surgery

Lipika Kalson  
PhD student

Yuliya Lim  
PhD student - Computational Biology

# Program

- Monday November 24<sup>th</sup>
  - 11-12:00 welcome and general introduction
  - 13-15:00 genomics lecture
- Tuesday November 25<sup>th</sup>
  - 9-10:00 single-cell RNA-seq lecture
  - 10-12:00 single-cell practical part I
  - 12-13:00 spatial RNA-seq lecture
  - Lunch break
  - 14-16:00 single-cell practical part II
  - 16-18:00 epigenomics and multi-omic integration lecture
- Wednesday November 26<sup>th</sup>
  - 9-10:00 AI for digital pathology
  - 10-12:00 AI for digital pathology practical part I
  - 12-13:00 AI for multi-modal integration
  - Lunch break
  - 14-16:00 AI for digital pathology practical part II
  - 16-18:00 projects

- Friday November 28<sup>th</sup>
  - 9-12:00 projects
- Tuesday December 16<sup>th</sup>
  - 14-16:00 project presentations
  - 16-18:00 networking event

# Practical information

## Computing resources

Scientific IT platform: dedicated portal for data analysis

<http://portal.sit.iarc.fr> / HPC: `osiris.iarc.lan`

Training-MG folder on Osiris

Accounts and gateway created for **external participants**:

<https://ovd-esg.iarc.who.int/ovd/>

login: `firstname.lastname@iarc.who.int`

password: received by email

Connection instruction were sent your (insa) email address

Teams channel: [IARC-Medical genomics course | General | Microsoft Teams](#)

GitHub page: [https://github.com/IARCBioinfo/medical\\_genomics\\_course](https://github.com/IARCBioinfo/medical_genomics_course)

## Lunch / coffee break

Cafeteria on ground floor

Clusters • Interactive Apps • Osiris Apps • Others Apps • My Interactive Sessions

International Agency  
for Research on Cancer

World Health  
Organization

Scientific IT Portal

OnDemand provides an integrated, single access point for all of your HPC resources.

Pinned Apps A featured subset of all available apps

 JupyterLab System Installed App	 RStudio System Installed App	 QPath System Installed App	 IGV System Installed App
 Fiji System Installed App	 NextFlow Tower System Installed App	 Visual Studio Code System Installed App	 Mega System Installed App

[Advanced Settings](#)

International Agency for Research on Cancer

# Practicals

1. **Single-cell and spatial transcriptomic analyses**
2. **Deep learning analysis of whole-slide pathological images**

Data on IARC's HPC Osiris

Launch jupyterlab from the IARC SIT platform (web browser)

Both using python, use links sent if needed (in particular the R to Python tutorial)

# Group projects

5 projects based on actual research done at the agency

- ranging from more bioinformatics oriented to more data analysis oriented
- Groups of 3 students

Group presentation on December 16<sup>th</sup> (10 min + 10 min of questions per group).

*Note the cafeteria will be unavailable this day for external participants.*

Evaluation for INSA students

- grade is 50% supervisor evaluation and 50% presentation evaluation
- Criteria are: understanding of subject, clarity of explanations, organization and structure of the presentation, visuals, engagement, and answer to questions
- All group members should present something

# Practical setup

- Log in to Inuvika using the login information sent to you on Friday
- Once in Inuvika, follow the steps listed in ***/data/Training-MG/files/scripts/Practical1/2025/TODO\_BEFORE\_PRACTICAL1.txt*** to setup your environment for the first practical.
- If you have some time left, follow the steps listed in ***/data/Training-MG/files/data/AI\_practicals\_2025/practical\_setup.md*** to setup your environment for the second practical.
- If you encounter any issues during the installation of your environments, let us know!
